

project: syntropy (Germany / Sweden / Shanghai-Singapore-Taiwan) creates AV technologies and solutions for professional simulation- and training environments, interactive, immersive media based attractions, xD dome theatres, planetariums as well as multimedia experiences. Many years of development and over one 150 projects world-wide have resulted in highly scalable turnkey fulldome cinema attractions.

Project

**UNSW (Sidney, Australia) DomeLab:
immersive 3D-Stereo Fulldome Solution**

Customer

UNSW University of New South Wales, Art & Design, Sydney, Australia.

Project

Mobile 6m fulldome all-in-one-solution featuring a foldable light-weight geodesic sphere, ultra high-resolution WQXGA 8-channel 3D stereo projection system, media server and domeprojection.com auto calibration; optimized for rapid assembly at optimum image quality.

Project Details

We designed a mobile turnkey fulldome system equipped with eight WQXGA projectors which is amongst the world's top hi-end multi-channel 4K-3D stereo projection systems. The global travel fulldome system, which is fast and easy to set-up, was developed for the UNSW University of New South Wales, Australia, to explore three themes: interactive media, future museology and experimental humanities and is the first experimental fulldome in Australia. Over the next years the team of UNSW Art & Design will run workshops, festivals and venues with its so called DomeLab and visit different places worldwide.

Traveling with the mobile DomeLab as well as assembly had to be easy and efficient: to meet those matters the fulldome consists of a lightweight, powder-coated aluminum geodesic frame; it is specifically designed for rapid assembly and comes complete with custom made flightcases. The double-layered screen equipped with negative pressure technology is made from custom shaped sheets of PVC welded together to create a perfect hemisphere for all kinds of projections. domeprojection.com auto calibration ensures seamless edge-blending and automatic geometry correction for an ultimate image quality. The surround audio system completes a rich media adventure. Professor Kenderdine and her team are thus very well equipped for their international five year DomeLab tour.

Leading Provider of Next Generation Immersive Fulldomes

About UNSW Art & Design Institute

UNSW Art & Design Institute is driving Australia's focus on media innovation and emerging technologies. The Institute foregrounds experimentation and exploration and is collaborating across science, engineering, the humanities and social sciences. It is Australia's largest community of art and design practitioners, researchers, educators and students with faculty members originating from more than fifty countries globally.

The immersive travel fulldome made by project: syntropy GmbH is Australia's first experimental fulldome that will advance new frontiers in immersive visualization, intelligent interaction and networked experiences for interactive media, museology and digital humanities research. "DomeLab is a post-cinematic and aesthetically potent research environment which has its technological roots in everything from domed architecture to planetariums, projection mapping, flight simulation, and virtual reality," says Sarah Kenderdine, initiator at UNSW Art & Design.
