

DOME CINEMAS 3D 4D 5D 6D

next generation DOME CINEMA attractions by

project:syntropy

DOME CINEMAS 3D | 4D | 5D | 6D

From classic dome cinemas to immersive domes with embedded interactivity: project: syntropy has been pushing the limits of the existing technology in terms of quality, reliability and adaptability for years.

project syntropy offers a one stop shop service from consultancy, the complete design stage to turn-key delivery.

project: syntropy builds bespoke dome attractions based on your visions and requirements. Start from a certain dome size our just give us the capacity you need and choose from a list of various set-ups and add-ons.

We have created dome systems and attractions from 0.8m diameter up to over 30m diameter for various purposes. Starting from our 0.8m miniature dome for content production, as a preview tool or as an interactive exhibit to our studio- and exhibition-domes with 5 - 8m diameter up to large capacity dome attractions even with special shapes and designs.

4D - Effects

Enrich the experience by adding various 4D theatre- or seat-based effects like fog, water, wind, snow or haze.

5D - Motion

For the ultimate immersion we offer motion seats (4 seats benches) or motion pods (4 - 18 seats) to be integrated into the dome. Ultra realistic experience is achieved by expert motion profile programmers. The all electric driven systems are designed for low maintenance and very long lifetime.

6D - Interactivity

Turn your venue into an interactive game! Our customizable gun systems and gesture recognition systems can be used for a wide range of interactive applications and games to create thrilling experiences. The open interfaces allow content or game designs to easily migrate between attractions.

Content

We cooperate with leading content providers and -producers to provide licensing of the latest movies or arrange a customized production for your theme or IP to make your attraction unique.

2D - Dome Style

Choose a style first: a classic planetarium setup, a tilted dome or our immersiveDOME.

3D - Projection Experience

Go beyond the standard setup and add spectacular 3D projection to your attraction. project: syntropy is specialized in state-of-the-art active3D projection using flicker-free 120Hz technology. Other 3D stereo systems can be offered as well.

miniDOME 25

The 5m dome (as can be seen on our IAAPA booth) offers a state-of-the-art experience for 25 people on a very small footprint for a competitive pricing. You may alternatively choose to have 8 motion seats (2x4).

immersiveDOME 200

With the same 20m by 20m footprint you can fit up to 200 people into a 16m hyper-dome. The visitors standing on the central platform are literally surrounded by the projection and thus fully immersed. This high-capacity attraction can be enhanced with interactivity as well.

classicDOME 134

classicDOME 134 is a 16m diameter classic dome cinema in tilted design. The 16m diameter dome features 134 seats, a stunning 4k visual with active3D stereo in 120Hz technology and a 7.1 immersive audio system. The footprint is about 20m by 20m.

motionDOME 80

Also based on a 16m tilted dome (20m by 20m footprint) this dome is equipped with 80 motion seats. This experience is designed to offer ultimate immersion. The 4-seat benches are electrically driven and redefine the quality of 5D theatre experiences.
