

project: syntropy (Germany / Sweden / Shanghai / Singapore) creates AV technologies and solutions for professional simulation- and training environments, interactive, immersive media based attractions, flying theatres, planetariums as well as XR-CAVEs. Many years of development and over 200 projects world-wide have also resulted in highly scalable immersive (XR-) environments.

Project

ATICA Restaurant Paris - Immersive Fine Dining Environment

Customer

ATICA, 8 Rue Frederic Sauton, 75005, Paris, France.

Project

Delivery, design, engineering, manufacturing, system integration and calibration of an immersive space audiovisual solution with 8-channel 4k Projection System, Media-Server, Autocalibration, Show Control, 6.1 audio.

Project Details

AV-System for Immersive Space in a Fine Dining Restaurant

We planned and delivered an immersive projection- and AV-system for Atica, a newly opened luxury restaurant in Paris. The solution comprises an 8-channel 4k projection onto three 5,5m high walls of the 95 sqm dining room in the basement of the restaurant, offering a projection surface of 112sqm. We also integrated the media server, an surround sound audio-system, show-control as well as an autocalibration solution for easier maintenance.

About ATICA

The founder Ramzi Saade says about his concept: "Atica is an immersive restaurant; a space nestled in the heart of Paris that celebrates cultures through gastronomy and art. The Atica experience awakes the 5 senses to celebrate the art of living of a new region each season. An Atica ticket invites guests to enjoy a memorable moment through an 8-act session allowing them to explore a new region through an artistic, sensory and culinary experience. Guests are immersed in a universe where every space, every moment and every detail has been imagined to sublimate their perceptions and awaken their emotions.

Leading Provider of Next Generation Immersive Environments

project:syntropy

Every visit to Atica is an invitation to a journey, where past and future weave together, creating a rich and vibrant tapestry of culture and taste. For its first season, Atica embarks on a journey to discover the Basque culture, straddling France and Spain. This experience celebrates the identity of this rich culinary and artistic cradle, imbued with a meeting between the Pyrenees and the Atlantic Ocean.”

Turnkey Visual Solutions for Simulation, Training and Media Based Attractions

project: syntropy offers turnkey projection solutions, tailor-made systems and full-service throughout the entire project.
